

13xx Modular Panels

The 13xx modular panels are a customisable, DALI-compatible range of user interfaces that allow control of the lighting system. Each module is fitted with indicator LEDs and an infrared receiver that gives the option of remote operation using DIGIDIM hand-held remote controls. The hand-held remote also allows additional control of the system's functions and can be used as a programming device on simple systems.

Key Features

- Choice of black (B) or white (W) modules.
