# eColor Fuse Powercore

Linear interior LED wall grazing fixture with solid color light

With narrow and medium beams of intense solid color light, eColor Fuse Powercore is an excellent choice for surface grazing and wall-washing applications. Its ultra-compact form factor permits installation in tight spaces too small to accommodate conventional grazing fixtures with similar light output. Lowers installation, energy, and maintenance costs. Offers environmentally-conscious buyers a green, energy-efficient grazing fixture with industry-leading quality and quantity of light.

- High-performance beam quality — Available in narrow 10° x 60° or medium 30° x 60° beam angles. Interlocking connectors allow for end-to-end installation with no light scalloping between fixtures.
- Integrates patented Powercore technology — Powercore rapidly, efficiently, and accurately controls power directly from line voltage, eliminating the need for an external power supply, dramatically simplifying installation, and lowering total system cost.

- Support for multiple voltages — Accepts power input of 100 – 277 VAC for consistent installation and operation from line voltage in any location around the world.
- Dimming capability — Patented DIMand technology offers smooth dimming capability with selected commercially available reverse-phase ELV-type dimmers.
- Easy mounting and positioning — With end-to-end locking power connectors that can make turns of up to 180°, eColor Fuse Powercore fixtures are easy to position in even the most challenging mounting circumstances. Fixtures rotate in 10° increments through 180° for precise aiming and color mixing. Optional mounting tracks support vertical and overhead positioning. 1 ft (305 mm) and 5 ft (1.5 m) jumper cables can add extra space between fixtures.
