

Using the Antumbra Panel Configuration Tool

Please see the below instructions for producing Antumbra labelling documentation.

<http://www.brerp.philips.com/antumbra/>

1. **Select Background Wall**
2. **Style**
3. **Orientation**
4. **Product Type** - Select AntumbraButton or Antumbra Touch
5. **Fascia Colour**
6. **Rim Colour**
7. **Customised Label**

When complete, click on the Download icon towards the button right of the screen.

Fill in the Reference Details:

- **Your Name**
- **Email Address**
- **PO Number** - Type in NA if this is not known
- **Company Name**
- **Project Name**
- **Panel Name** - A specific LCP identifying number together with a room name works best.
- **Number of Panels** - This is the duplicate number of the same panel NOT the total number of panels on the job.

Selecting one of the following options will produce a PDF of the required Antumbra panel. It is important that the correct option is selected as the configurator will produce a part number that will be used to order from.

- For a complete PABPA or PATPA Button Application module click on the **Full Product PDF** button.
- For the PABSA button (AntumbraButton) and PATSA fascia (AntumbraTouch) spare parts, click on the **Button/Fascia PDF** button

Save/Download the produced PDF as an individual PDF without changing the file name.

Forward all of the individual PDFs to Lightmoves (or your Lightmoves representative) by email or upload them to a Dropbox (or similar) file, and provide us the download link.
