

IP20  RoHS

TALEXengine LINE TALEXengine LINE

Easy Clip System

Product description

- For displaying products on shelves and in cabinets
- For use in luminaires
- Wide range of products
- Ready to connect solution
- High efficiency thanks to directional lighting and integrated heat removal
- High quality of light thanks to a combination of COB LEDs and optics
- Long life: 35,000 hours (for a 70 % drop in luminous flux and tc point temperature of 45 °C)
- Simple installation with mounting plate (optional)
- Can be expanded with extensive accessories (optional)
- Dimmable by pulse width modulation (PWM)
- Cooling section made of anodised, extruded aluminium
- End caps made of aluminium
- Linear lenses made of PMMA
- Safety extra low voltage (SELV), protection class III

Technical data

Supply voltage DC [®]	24 V
Ambient temperature ta	-30 ... +30 °C
Max. surface temperature on profile tc	65 °C
Type of protection	IP20
Protection class	III

Standards, page 5

Colour temperatures and tolerances, page 7

^① Tolerance range for optical data: ±15 % (values without lens).

^② Tolerance range for electrical data: ±15 %.

^③ Exceeding the max. operating voltage leads to an overload on the TALEX module. This may in turn result in a significant reduction in lifetime or even in destruction. Tolerance range for the supply voltage: +2 V / -0 V.

All values at ta = 25 °C and tc profil = 35 °C.

Converters matrix – TALEXengine LINE, constant voltage

The mentioned number of TALEXengine LINE is based on the typical electrical values of TALEXengine LINE and converter.
In individual cases it is possible that the actual number of TALEXengine LINE can be different to the values stated in the table because of the tolerance of electrical values.

Standards

- EN 60598-2-1
- EN 62031
- EN 62471

Note

- Reversing the polarity may damage TALEXengine LINE.
- There is no provision for chaining multiple TALEXengine LINE units

Electrical supply

TALEXengine LINE modules from Tridonic are not protected against overvoltages, overcurrents, overloads or short-circuit currents. Safe and reliable operation can only be guaranteed in conjunction with a converter which complies with the relevant standards. The use of TALEX converters from Tridonic in combination with TALEXengine LINE guarantees the necessary protection for safe and reliable operation.

If a converter other than Tridonic TALEXconverter is used, it must provide the following protection:

- SELV
- Short-circuit protection
- Overload protection
- Overtemperature protection

0 °C	30 °C	40 °C
20 °C	50 °C	60 °C
30 °C ^②	60 °C ^②	70 °C ^②

① The values apply to operation at 100 % output, natural convection

② If the maximum temperature limits are exceeded, the life of the LED will be greatly reduced or the LED may be destroyed.

The tc point temperature on the profile of TALEXengine LINE should be measured in the thermally stable state and under operating conditions by means of a temperature sensor or temperature-sensitive sticker (available for example from www.conrad.com, www.rs-components.com) as per EN60598-1. The backside of TALEXengine LINE can be used as the tc point.

Wiring

Cable: H03WH; cross-section 2x0.75 mm²; white; length: 1.0 m

	Cord 1	Cord 2
Colour	Red	Black
Function	+	-

Cable length

In view of the voltage drop along the cable, a voltage of at least 24 V must be applied to TALEXengine LINE in order to achieve the rated luminous flux.

Maximum cable length for operation with TALEX converter

Type	0.75 mm ²	1.0 mm ²	1.5 mm ²	2.5 mm ²
24V	6.5 m	8.5 m	13 m	22 m

Optical properties (DL, LE1500)
ta = 25 °C / tc Punkt Profil = 35 °C
